

MSc SUPPLY CHAIN MANAGEMENT AND PURCHASING

Programme taught in English at the Lille campus - Duration: 18 months
This MSc is accredited by the Conférence des Grandes Ecoles (CGE)

INTAKE: September

*A unique combination of two related fields
with the project management discipline*

CAREER OPPORTUNITIES

Graduates of this MSc have strong potential for recruitment. The field of purchasing and supply chain offers a variety of possible assignments and jobs ranging from generalist supply chain management, materials management and project management to specialist purchasing, procurement, demand planning, logistics & transportation, as well as consulting positions.

PROGRAMME OUTLINE

The MSc in Supply Chain Management & Purchasing provides a unique opportunity for acquiring a specialist qualification in the area of purchasing, supply chain management, combined with a generalised one in project management. This MSc programme is designed for practising professionals, mid-career managers and graduates seeking specialised training in these complementary fields at managerial level.

WHY CHOOSE THIS PROGRAMME

- ▶ The MSc offers a dual competency in supply chain management, and purchasing & project management.
- ▶ Internationally recognised certifications are facilitated within this MSc. Certifications include preparation for the Supply Chain Apics® Basics Certification, PRINCE2® and AGILE professional certifications of the APMG®. A Lean Six Sigma certification is also included.
- ▶ Collaboration with local companies who contribute to the programme design and who teach on the programme.
- ▶ International faculty, both academics and professionals teach on the programme and students come from all over the world.
- ▶ SKEMA Business School has developed many links with professional bodies at national and international level, in particular for the development of international standards and research. SKEMA Business School is involved with: APICS®, ASLOG, Project Management Institute PMI®, APM Group (PRINCE2®).

Romain Lanneretonne, MSc Supply Chain Management & Purchasing 2013-14

I decided to apply for this MSc at SKEMA because I wanted an international career. It's only once I started work, in June, at the supply chain operations level for the global American company Extreme Networks in Taiwan that I realised just how valuable the classes are. In fact, every day I am improving our business processes by putting in practice the concepts and theories learned through classes, case studies, projects or certifications such as SCOR and CAPM from the Project Management Institute."

Morgane Pladys, MSc Supply Chain Management & Purchasing 2012-13

I'm totally satisfied with this MSc. I've learnt a lot thanks to its content and my internship. I am confident about entering the job market, and I think that is the most important thing. One of the "added values" of this MSc is that we had the opportunity to apply all this knowledge concretely during the second semester by doing a supply chain audit in a company. The firm was also very happy with our work and offered us a job at the end. One of our team took them up on the job offer. What I really appreciated too is the personalised student follow-up. The MSc director places emphasis on entering the job market and gives students a lot of help to find a job which matches their expectations."
