“
Our knowledge and expertise will support you as you hone your skills and prepare for the next stage of your journey.
”

Professor Iain Martin
Vice Chancellor

As you're no doubt well aware, a postgraduate qualification will deepen your knowledge, sharpen your skills, and help you to plan the next stage of your career with confidence.

In this guide to postgraduate degrees at Anglia Ruskin, you'll find out about our wide-ranging portfolio of courses, our world-leading research, our investment in new facilities, and the impressive achievements of our students, staff and alumni. I hope you'll also gain a sense of the energy and diversity of student life here.

What you may not yet know is that, as a global 'rising star'*, we're committed to championing research that makes a real difference. This involves growing our postgraduate student body, encouraging the best of our postgraduate researchers to join

our academic staff, and attracting the brightest talent from around the world. Our award-winning lecturers possess deep, practical experience in their field, and our strong industry links and professionally accredited courses prepare our students for the opportunities and challenges that lie ahead.

So, whether you aspire to further your career prospects, develop a specialist area of interest, or undertake a research project, you'll find the highest quality teaching standards, excellent resources and a creative, collaborative atmosphere. And, with flexible delivery methods and a choice of great places to study, you can learn with us in a way that fits with your lifestyle and outside commitments.

Welcome to Anglia Ruskin!

You're in the *right place*

If you're contemplating continuing your studies after graduation or returning to education after time away, taking that crucial next step involves more than simply picking the right course.

There's the tricky business of finding a course that balances academic excellence with industry relevance, and then ensuring that – having chosen a course that meets your particular needs – you can study in a way that suits your lifestyle and responsibilities.

That's why we've created postgraduate courses tailored to your career goals and designed to reward your commitment to taking your studies further, while also giving you the freedom to study your way.

Raising standards

Whether you choose to pursue your passion through research or decide to undertake one of our industry-recognised taught courses, our innovative and outward-looking university offers outstanding facilities, student support and teaching from award-winning lecturers. Recently identified as the only UK university to be a 'rising star', we are predicted to be challenging the global elite by 2030*.

Be a part of something great

Full or part-time, there's a way for you to be part of our ambitious academic community, and you'll also benefit from our strong industry links. Each year, we support some 2,000 businesses that are looking for bright, talented people. And if you've got a business idea, we've got a Startup Lab, mentoring programme and other enterprising initiatives to sharpen it up for the marketplace.

Our research is classed as "world-leading" by the most recent Research Excellence Framework (REF) 2014 and our strengths encompass the arts, business, English language and literature, history, music, law, psychology, social work and social policy. We have six research institutes dedicated to tackling pressing issues, from conserving our precious natural resources to saving lives through pioneering surgery.

2016 saw Anglia Ruskin listed in the Times Higher Education's (THE) World University Rankings for the first time

One of the top
350
institutions in the world

We're in the top
40
universities in the UK

Enhancing your *career prospects*

When you choose Anglia Ruskin, you're choosing a global university where careers take off. From day one, we'll help you work towards your ambitions, graduating with skills and qualities valued the world over.

We're well connected

During your time at Anglia Ruskin, you'll benefit from our strong industry links in a variety of ways. You'll learn from people who are at the top of their profession, make connections with potential employers, and have opportunities to hone your skills in real working environments.

Each year, we
support around

2,000

businesses including Harrods, Tesco, Barclays, UPS and the NHS – in their search for bright, talented people.

Our courses are created with industry and sector approval

Many are professionally accredited, ensuring that you'll be working towards a qualification that employers trust and respect. Some of the professional bodies we work with include:

“

Our courses offer industry experience, *giving you the chance to network with experts and employers* and make valuable connections.

”

Study in an *exceptional* *environment*

You'll find our campuses in three vibrant cities: Cambridge, Chelmsford and Peterborough. We also offer opportunities to study via distance learning or at one of our partners. As one of the largest universities in the East of England, we're proud to educate the future professionals that will shape our world.

Over
12,000

postgraduate students,
from all around the
world, chose to study
with us last year

City living

Cambridge

Cambridge is internationally renowned as a centre of learning, and we've been here since 1858, when Cambridge School of Art first opened its doors. Our friendly, bustling campus is a five-minute walk from the historic city centre with its vibrant cultural and social scene.

Chelmsford

With its rich mix of independent stores, recently redeveloped city-centre retail and leisure areas, and lots of restaurants, bars and cafés, Chelmsford is compact enough to explore and enjoy at your leisure while having plenty on offer. You'll find our campus just a short stroll from the lively city centre, in Chelmsford's University and Innovation Quarter.

Peterborough

Peterborough has everything you're looking for in a city, only on a more intimate scale. Our Guild House campus opened in 2011. It's a dedicated healthcare site where we train many of the region's nurses, social workers and healthcare professionals.

Partner Institutions and Associate colleges

At each of our partners you'll find a range of full-time and part-time study options. You'll graduate with a fully accredited or validated Anglia Ruskin degree, having benefited from the same high-quality teaching and support in state-of-the-art, well-equipped surroundings.

World-class resources

From mock hospital wards to simulation suites for training health professions, theatre skills laboratories to forensic science labs, and a TV studio, you'll have access to multi-million pound facilities designed for hands-on learning.

Michael Salmon Building

A spectacular hub for postgraduate clinical research and teaching in Chelmsford – it's fast becoming known internationally as a centre of excellence.

Michael Salmon Building,
Chelmsford campus

We are ranked in the top 20 universities in the UK for teaching excellence in The Times and The Sunday Times Good University Guide 2017.

We translate science and epidemiology into health education and primary care, and deliver taught Masters programmes to qualified medics.

The Lord Ashcroft International Business School

As one of the largest business schools in the eastern region, we provide opportunities for study in Cambridge or Chelmsford, as well as at our partner institution in London, and distance learning options.

The MedBIC

A specialised centre in Chelmsford to support medical technology businesses that are just starting out.

We're a lead partner in visionary initiatives, including the Anglia Ruskin MedTech Campus, which will be one of the world's largest health innovation spaces.

New School of Medicine Coming soon

We have a 20 year history as the largest provider of Nursing, Midwifery and Allied Health courses in the East of England. To build on our success, we're excited to launch our School of Medicine in Chelmsford to help address the urgent need for more doctors and healthcare professionals in the UK, and specifically in Essex.

Research that makes a *real difference*

Our five faculties and six research institutes bring together a wealth of expertise, and a passion for the advancement of knowledge that generates world-leading research. Led by an inspiring team of academics, we champion a cross-disciplinary approach to research that bridges economic, scientific, technical and creative fields.

We cover a range of topical issues, from financial crisis and the impact of conflict-driven migration, to the use of cutting-edge technology in remixing music and advancing medical practice.

Institutes with impact

Our research institutes are internationally recognised centres run by Anglia Ruskin in collaboration with business, government and third-sector organisations. Well-funded and highly equipped, they employ and host world-leading experts, generating knowledge that benefits the world and feeds directly into our teaching programmes.

Our institutes are part of a wider community of research units, centres, groups and clusters based here. Many of these contribute to the institutes' multidisciplinary projects.

We achieved the highest, world-leading ranking across 12 areas of research.

Allied Health Professions, Dentistry, Nursing and Pharmacy

Research institutes

Leading our research activity, our research institutes form centres for the advancement of knowledge and practice in the following key areas:

Anglia Ruskin IT Research Institute (ARITI)

Using advanced research tools and techniques, we provide new IT solutions and enhance the performance of existing systems through intelligent modelling and visualisation. We're currently working with over 20 local and international partners on research and development projects.

anglia.ac.uk/ariti

Cultures of the Digital Economy Research Institute (CoDE)

CoDE brings together talented creative and technical specialists to deliver practical answers to real-world needs and desires. By considering technology in both an artistic and cultural context, and with respect to our evolving digital economy, we help industry more successfully design towards ever changing trends.

anglia.ac.uk/code

Feature video

Zap to find out about our research into chronic pain and out-of-body illusions, or visit anglia.ac.uk/outofbody

Global Sustainability Institute (GSI)

The GSI is committed to playing a key role in developing practical solutions to the sustainability challenges we all face, both locally and globally. This is done through research and education - bringing together the information needed to make decisions, with the people capable of taking action.

anglia.ac.uk/gsi

Policing Institute for the Eastern Region (PIER)

PIER are committed to the delivery of innovative and high quality research, professional development and knowledge exchange for the improvement of policing practice in the eastern region. PIER draws upon the collective expertise from across the university in areas such as leadership and organisational development, health and social care, technology, crime and public protection.

anglia.ac.uk/pier

Postgraduate Medical Institute (PMI)

The PMI has been developed to make a real difference to everyday lives. Our collaboration network inspires, leads and supports clinical research, learning and innovation along the care pathway; sharing best practice, promoting research and developing and encouraging innovation in medical devices and medical engineering.

anglia.ac.uk/pmi

Veterans and Families Institute (VFI)

This institute was established with the intention of carrying out valuable research, policy development, consultation and teaching relating to veterans and military families. Since its launch in 2014, the VFI has worked with military charities, government agencies and departments, the statutory sector and other universities on a range of research and consultation programmes.

anglia.ac.uk/vfi

Research highlights

Our research matters. It matters to organisations, communities, and individuals. It matters because it makes a real difference.

Find out more

about Chesmal's research into prolonged forced displacement in Sri Lanka and its impact on mental health
anglia.ac.uk/migration

Conflict-driven migration and mental health

While the European migrant crisis continues, countries further afield that have experienced forced migration have helpful lessons.

Dr Chesmal Siriwardhana's research investigates the mental health and resilience of internally displaced people affected by prolonged (over 20 years) forced displacement in Sri Lanka. His work, in collaboration with the Institute of Psychiatry, Psychology and Neuroscience, King's College London and the Institute for Research & Development, Sri Lanka, is the first comprehensive study to explore prolonged forced displacement in Sri Lanka and its impact on mental health.

Why does it matter?

The findings of this research will make a tangible impact on improving the health of post-conflict populations. This work has led to the development of a global initiative around ethical challenges in humanitarian research and the post-research ethics audit process.

Helping the police get the best out of technology – benefits realisation and whole systems thinking

Police technology is changing. Instead of a myriad of different systems for storing and handling data on crime and other incidents, the police are moving toward large modern shared inter-force platforms. Athena, one such platform, has the potential to transform policing. The bad news is that organisational change, some of it painful, is needed to extract the value from these potential benefits. That's where benefits realisation comes in.

The research work commissioned from the IIMP was to assess the Athena project's benefits realisation process and documentation and to bring it in line with contemporary best practice. Benefits realisation ensures that project outputs, i.e. physical attributes like interfaces, certain processing functions and so forth, actually link, through clearly defined benefits and organisational change, to the objectives of the organisation. Only through a rigorous and purposive approach can the organisation identify and put in place the changes it needs to get the best out of the technology.

Why does it matter?

Benefits realisation identifies 'what needs to happen next', along with identifying the governance that needs to be in place to achieve it. The research we undertook also reinforced the point that if organisations like the police want to capture the benefits from the changes they make, they themselves need to become both rigorous and flexible in their approach to organising.

How to turn your emotional baggage into dating success

It may seem that new relationships are entirely fuelled by dreams and hopes for a perfect future. But the past can have a powerful influence too – often more so than we would like to admit. The 'emotional baggage' that we bring from the past can mean that we sometimes pick a partner who's not quite right, make bad relationship decisions or find it difficult to fully devote ourselves to the person we are with.

To find out more about our research in this area head to anglia.ac.uk/datingsuccess

We're here to help

Studying at postgraduate level is both challenging and rewarding, so we've got a strong support network to help you get the most from your time at Anglia Ruskin.

If you need advice or help with anything related to living or studying here, just speak to our Student Services team. We provide a range of services designed to help you achieve your goals with the minimum stress and hassle.

Personal Tutors

Every student is allocated a personal tutor at the start of their course – your first point of contact for questions about your studies.

iCentre

At the hub of each campus, our friendly iCentre teams are on-hand to help with all aspects of student life and make your experience as stress-free as possible. From travel advice to results, hand-ins to ID cards, you'll always get informed and user-friendly advice.

Faculty Student Advisers

You'll be allocated a student adviser who will guide you through our academic rules and regulations, and can help you to choose modules to tailor your course, where applicable.

Counselling and wellbeing

Postgraduate study is incredibly fulfilling, but there can be challenges. Our Counselling and Wellbeing Service is available to all students at Anglia Ruskin, and offers a free and confidential service to support you in times of stress or anxiety.

Study skills

We know it can be tricky to balance home life, work and study. Time management is one of the many dedicated study skills sessions we can offer to help you get the most out of your academic studies.

A warm welcome for international students

Our dedicated International Office will support you throughout your application process and arrival, and will make your first steps towards joining us as easy as possible.

Visit: anglia.ac.uk/international
Email: international@anglia.ac.uk
Call: +44 (0)1245 493131

Support for disabled students

Our Study Support Service offers information, advice and specialist support to students with disabilities, including mental health difficulties, ongoing medical conditions and specific learning difficulties such as dyslexia. We hold drop-in sessions for current students, where you can discuss anything with us in confidence.

Find out more

To get in touch with the Student Services Team or find out more, head to anglia.ac.uk/support

Achieving your goals

Encouraging big ideas

Anglia Ruskin Enterprise Academy (AREA), based in the Lord Ashcroft International Business School, is a hub that develops, coordinates and consolidates all enterprise and entrepreneurship extracurricular activities across the whole of Anglia Ruskin. If you've got a business idea, we've got the Startup Lab, a mentoring programme and other enterprising initiatives to help it become a reality.

Zap to find out more, or check out anglia.ac.uk/enterprise

Work while you study

Our Employment Bureau has offices on our Cambridge and Chelmsford campuses and will help you find temporary work to fit around your studies or advance your career once you graduate. It also has an online job search service, which lists all of our current job vacancies.

For more information, visit anglia.ac.uk/eb

Increasing employability

Our Employability Service will help you develop the skills, knowledge, experience and professional qualities you need to achieve your ambitions. Each of our Faculties has a dedicated Employability Adviser who will help you prepare for the crucial next stage of your career. With access to regular workshops, drop-in sessions, job fairs, employer events, company tours and employer talks, you'll find all the support you need.

You can also talk to our experienced Careers Advisers, and there's a comprehensive employability website giving you instant access to advice, information, tips and job opportunities.

To get in touch, go to anglia.ac.uk/employability

Continue your story

Read on to explore our postgraduate courses, head to p75 to find out about upcoming Open Days, or get more detailed information online at anglia.ac.uk/pg

Choosing the *ideal* course

Our postgraduate courses are designed to give you the freedom to study in a way that suits you. But flexibility doesn't come at the cost of quality; whether on-site or at a distance, you'll learn from industry experts and have access to all the support and resources you'll need to achieve your full potential.

Depending on your previous qualifications and academic goals, you can choose from the following taught postgraduate qualifications at Anglia Ruskin:

Masters degrees

Our Masters degree courses normally combine taught modules with a dissertation or major project. These usually take 12 months to complete on a full-time basis, or up to 33 months part-time, and are a total of 180 credits.

We offer the following types of Masters award:

- Master of Arts (MA)
- Master of Business Administration (MBA)
- Master of Engineering (MEng)
- Master of Law (LLM)
- Master of Optometry (MOptom)
- Master of Osteopathy (MOst)
- Master of Science (MSc)
- Master of Surgery (MCh)

Usually, you'll study a mixture of compulsory core modules and optional modules based on your own interests. Both involve assessment elements and will earn you credits that contribute to your final qualification.

Postgraduate diplomas and certificates

A Postgraduate Diploma (PG Dip) or a Postgraduate Certificate (PG Cert) is generally a similar level of study to a Masters degree, but without the final project or dissertation. These are ideal for graduates who want to update their knowledge in a specialist field or return to study after a break in education.

PG Dips are comprised of 60 credits and PG Certs are 120 credits. With further study you can upgrade either qualification to a 180-credit Masters degree.

Continuing Professional Development

Enhance your skills and knowledge with our short courses. Offered both on campus and by distance learning, we tailor our courses to your needs.

With a wide range of courses across our faculties, you're sure to find the course for you. Explore the full range at anglia.ac.uk/cpd

Study your way

At Anglia Ruskin, you can fit postgraduate study into your life. No matter how demanding your commitments, you'll feel part of an ambitious community, led by inspiring, award-winning tutors. If full-time study isn't an option, we're the largest provider of part-time courses in the East of England. We've been teaching thousands of part-time students for decades.

You can choose from a range of flexible options, including part-time study at one of our three city campuses, distance learning and work-based study.

And with access to the latest facilities and virtual support, you'll gain the expertise you need in a way that works for you.

Most of our courses offer the option to start in September 2017 or January 2018 – it's up to you.

Find out more

For more information on credit levels, go to gov.uk and search for **National Qualifications Framework**.

Doctoral study at *Anglia Ruskin*

If you're considering doctoral study at Anglia Ruskin, you'll be joining an academic community that's passionate about research and its power to help individuals, companies and governments enhance social, cultural and economic wellbeing at a global and national level.

We cover a range of topical issues, from forecasting the economic impact of 'Brexit' and of conflict-driven migration, to the use of cutting-edge technology in remixing music or advancing medical practice.

Dr Peter Brown leads our research on ladybird ecology

The Doctoral School

We have created a Doctoral School to provide focused support for our postgraduate research (PGR) students. The School brings together, into one unit, the administrative support for our PGR activity, as well as the Researcher Development Programme of seminars and workshops. We offer support for the following types of doctorates:

Doctor and Master of Philosophy (PhD/MPhil)

We offer PhD and MPhil study across a wide range of subject areas and in each of our five Faculties.

Your first step is to identify an area where significant new knowledge or understanding will be generated. Having determined an intellectual problem ('gap in knowledge'), you'll establish your research question or hypothesis, and then formulate a framework for undertaking your research.

A full-time PhD candidate should be ready to submit their thesis for MPhil after 2 years and for PhD after 3.5 years. Part-time candidates should be ready to submit for MPhil after 3 years and for PhD after 5.

Doctor of Medicine by Research (MD (Res))

MD (Res) degrees are a higher degree available to qualified medical doctors and dentists. You'll undertake an in-depth research study that will relate specifically to your own medical practice. Completion of the doctorate will identify you as an expert in your field. The qualification will also demonstrate that you have a proven ability to problem-solve and to conduct original research at a very high level, contributing to the existing body of knowledge within your own specialist field.

Professional Doctorate (DProf)

These programmes are tailored to meet the needs of experienced professionals and practitioners, and allow you to obtain this professional qualification whilst researching and solving complex problems in your own workplace. Research focuses on your own professional practice and integrates professional and academic knowledge. Please check with us before you apply as most DProf programmes are only offered in part-time mode.

We offer DProf programmes in the following subject areas:

- Business and Management (DBA)
- Education (EdD)
- Health and Social Care
- Practical Theology
- Science and Technology

Research Degrees Involving Creative Work

Practice-based doctorates include practice as an integral component (or theorise that practice). This type of doctorate advances knowledge partly by means of practice. Creative work must be accompanied by a written component (thesis or commentary), the length of which must fall within the boundaries established by the Research Degrees' Regulations.

PhD by Published Work

If you already have published work that has demonstrated an independent and original contribution to knowledge, together with an understanding of research methods appropriate to the field, you may be eligible for a PhD by Published Work.

Animal and Environmental Sciences

Animal and Environmental Sciences, Animal Behaviour: Applications for Conservation, Applied Wildlife Conservation, Equine Science, Science and Technology, Sustainability, Zoology

Sustainability is at the heart of what we do here, and our postgraduate courses develop the skills needed to identify the problems facing our natural world, measure and predict the impact on our resources, and actively seek solutions and alternatives.

Career pathways

Our courses equip you with the knowledge and skills you'll need to advance your career in professions including:

- Biologist
- Conservation Data Manager
- Conservation Educator
- Ecotourism or environmental consultancy
- Education
- Research Assistant
- Sustainability Consultant to businesses, governments or NGOs
- Zoo Curator
- Zoologist

Research specialisms

- Animal behaviour
- Conservation and evolutionary genetics
- Engineering monitoring, management and policy
- Global change ecology

At Anglia Ruskin, you will join a scientific community concerned about our environment and the natural world, and committed to making a difference through sustainable practices and shared knowledge.

Whether analysing and using animal behaviour techniques to find solutions to biodiversity loss, conserving precious wildlife through genetics research and statistical analysis, or becoming an agent for positive change in the workplace, you could be the catalyst for a brighter future.

Our graduates are building careers in organisations including Zoological Society of London (ZSL), Royal Society for the Protection of Birds (RSPB), Wildlife Trust and the Department for Environment, Food and Rural Affairs (DEFRA), as well as their own businesses and as freelance consultants.

Our MSc Sustainability is partnered with the Eden Project.

Staff Spotlight

Your course leader

Dr Peter Brown
Senior Lecturer,
Department of Animal and
Environmental Biology
anglia.ac.uk/drbrown

Peter’s key area of research is ladybird ecology. He’s joint scheme organiser of the UK Ladybird Survey and co-author of two recent books on ladybirds.

Peter’s research focuses on understanding the spread distribution of the invasive harlequin species, both in the UK and worldwide. He monitors the effects of the harlequin’s spread on our native ladybird species and is involved in genetic work to detect predation of ladybirds and other prey by the harlequin.

Our Global Sustainability Institute was launched in 2010 and is committed to playing a key role in developing practical solutions to the challenges facing humanity.

Postgraduate Taught Courses	Award	Mode	Campus
Animal Behaviour: Applications for Conservation	MSc	Full-time, Part-time	Cambridge

Art and Design

Art and Design, Children's Book Illustration, Computer Games Development (Art), Creative Writing, Fashion Design, Film and Television Production, Fine Art, Graphic Design and Typography, Illustration and Book Arts, Photography, Printmaking

The creative economy in the UK is booming with 1 in 11 jobs either in the creative industries sector or a 'creative' job in other sectors. At Cambridge School of Art you can achieve your career aspirations, while following your passion.

C ▲ M
B ■ T
D G E

Inspiring
Creativity since
1858

All our courses offer a distinctive integration of practice and theory. With access to industry-standard facilities and research-active staff who are recognised nationally and internationally as leaders in their fields, you will be joining a diverse and stimulating mix of students, academic and technical staff, visiting artists and industry representatives who work closely together in a vibrant, supportive and friendly environment.

Benefit from our strong links with industry including Cambridge Original Printmakers, Changing Spaces, Wysing Arts Centre, Cambridge University Press and Sony, as well as our national and international links and partnerships.

Research specialisms

- Art and design
- Children's book illustration
- Film and television production
- Fine art
- Graphic design and typography

Built as the original art school in 1909, the historic Ruskin Building remains at the heart of the University's Cambridge campus. Engaging with current debates surrounding contemporary practice, and housing state-of-the-art facilities, the modern-day Cambridge School of Art is an inspiring combination of old and new. The original Ruskin Building houses light, bright studios along with industry-standard film and photographic facilities, and 150-year-old printing presses alongside dedicated Apple Mac suites.

Global expertise

Our lecturers have impressive CVs full of industry experience and professional practice. Many of them continue to work professionally, alongside teaching.

World-leading research

Our academics regularly publish research through exhibitions, books, journal articles and conference papers and this informs their teaching.

In the last Research Excellence Framework, our art and design research was deemed of 'international' standing with some areas 'world-leading'.

Research groups - which are accessible to all postgraduate students - organise lectures, seminars and conferences. The Fine Art Research Unit offers artists' talks and the Centre for Children's Book Studies organises the annual Festival of Illustration.

We're the only university-based art school in Cambridge

Find out more

Staff Spotlight

Your course leader

Dr Catherine Elliott

Course Leader and Senior Lecturer,
MA Film and Television Production

anglia.ac.uk/drelliott

Catherine has spent over 20 years working in the British television industry. Before joining Anglia Ruskin in 2012, she directed and produced a broad range of award-winning single films and documentary series for the BBC, Channel Four and Thames Television, working on flagship strands such as Cutting Edge, Modern Times, Inside Story, Dispatches and Rough Justice.

Student Spotlight

In 2016, MA Children's Book Illustration alumnus Maisie Shearring won the International Award for Illustration at the annual Bologna Children's Book Fair in Italy, the largest and most prestigious children's book event in the world. Her project, *Susan's School Days*, landed her US\$30,000 and the opportunity to illustrate a book published by the SM Group.

Building and Construction

Built Environment, Civil Engineering, Conservation of Buildings, Construction Management, Construction Project Management, Property and Facilities Management, Science and Technology, Sustainable Building Engineering, Town Planning

Whether you are passionate about protecting our architectural heritage or keen to create structures that will transform the city skyline, our accredited Masters courses will give you the expertise to build a career in the construction and built environment sector.

All our courses are grounded in the working world and are supported by Anglia Ruskin's strong links with industry. Across the subjects, you will cover theory, legislation, and societal and economic factors, assembling a comprehensive knowledge base in your chosen field and developing your existing skills to manage projects and shape the world around us.

With full- and part-time options available, we are committed to helping you combine study and work to gain qualifications that will enhance your experience in the industry.

Staff Spotlight

Your course leader

Dr Alan Coday

Principal Lecturer;
MSc Course Leader;
Departmental Research
Coordinator and Unit16
REF Convenor

anglia.ac.uk/drcoday

Alan is a materials scientist and building surveyor specialising in heritage buildings. His experience has led to successful European research and completion of PhDs and Professional Doctorates featuring sustainability in the built environment.

With a background at the Ove Arup Partnership and the Building Research Establishment, Alan's focus on materials science and building surveying has led to successful research optimising the sustainable use of materials and construction-related management techniques.

Career pathways

Our courses equip you with the knowledge and skills you'll need to advance your career in professions including:

- Civil Engineer
- Built Heritage Consultant
- Construction Project Director
- Historic Buildings Conservation Officer
- Project Manager
- Sustainable Building Engineer
- Structural Engineer
- Town Planner
- Urban Design Architect

Research specialisms

- Infrastructure design and professional practice
- Sustainable architecture and building services
- Sustainable communities
- Sustainable construction materials

Achieving excellence through accreditation

Many of our courses are accredited by industry, so you can be sure that your qualification will be relevant and attractive to employers when you graduate:

- Chartered Institute of Building (CIOB)
- Institution of Civil Engineers (ICE)
- Association for Project Management (APM)
- Institute of Historic Building Conservation (IHBC)
- Royal Institution of Chartered Surveyors (RICS)
- Royal Town Planning Institute (RTPI)
- Institute of Highway Engineers (IHE)
- Chartered Institution of Highways and Transportation (CIHT)
- Institution of Structural Engineers.

Business and Finance

Accounting and Finance, Business and Management, Business Management, Consumer Psychology, Data Centre Leadership and Management, Healthcare Management, Human Resource Management, International Business, International Business Law, International Commercial Law, International Hospitality and Tourism Management, International Project Management, Management, Marketing, Master of Business Administration, Master of Business Administration - International, Project Management, Property and Facilities Management, Supply Chain Management

The world of business is alive with new concepts and technologies. In this dynamic environment, it's vital to be able to demonstrate your capabilities in enterprise and innovation. Where better to continue your studies than at 2016's Winner of the Duke of York Award for Entrepreneurship*?

Our courses give you the opportunity to learn from expert lecturers who possess deep and wide-ranging experience in industry. Working with leading brands such as Barclays Bank, UPS, Crawford and Company, and Volvo ensures that our courses remain relevant to fast-moving markets. We also have long-standing and valued partnerships with the Ministry of Defence, many SMEs in the region and several county councils.

For those already in the workplace, a large percentage of our courses are offered on a part-time basis, giving you the option to continue with the job you love while gaining the knowledge and qualifications to build the career you want.

We gained national recognition for our entrepreneurial excellence when we won the Duke of York Award for University Entrepreneurship at the 2016 Lloyds Bank National Business Awards.

Zap to find out what winning the award means to us or visit:
anglia.ac.uk/dukeofyork

Chelmsford Library

Research that makes a real difference

Our research is both rigorously applied and highly relevant. The Research Excellence Framework (REF) 2014 assessment exercise scored us highly for economic, social and practical impact, rating 80% of our research as world-leading or internationally excellent.

This recognition demonstrates the relevance of our research to everyday life and provides justification for working closely with small businesses, corporations, public sector and voluntary organisations, and government departments. Further evidence comes from the knowledge that these partners rely on us to find solutions that deliver measurable results in the real world.

Our Bloomberg Financial Markets Lab, Chelmsford

We are helping to develop the next generation of business practitioners and thinkers. Our Bloomberg Financial Markets Lab, in Chelmsford, is a bespoke financial trading platform which provides live financial information on companies trading on global stock exchanges, keeping you current in economic affairs.

Career pathways

- Accountant
- Auditor
- HR Director or Manager
- International Supply Chain Manager
- Marketer
- Project Manager

Computing and Digital Technology

Cloud Computing, Computer Games Development (Art), Computer Games Development (Computing), Computer Science, Cyber Security, Electronic and Electrical Engineering, Information and Communication Technology, LLM Digital Economy, Medical Technology, Networking, Science and Technology, Sound Engineering, Telecommunications

Develop your skills and test your theories in our Cisco, Gaming and Electronics labs.

Technology is constantly evolving, changing the way we live and work at an unprecedented pace. Our postgraduate computing and technology courses are designed to help you develop industry-leading skills that will enable you to get, and stay, ahead.

From building the complex digital infrastructures needed to support major organisations, to developing the next best-selling computer game, our courses will give you the practical skills and experience to confidently build your career and become a specialist at the forefront of established and emerging technologies.

Career pathways

Our courses equip you with the knowledge and skills you'll need to advance your career in professions including:

- Analyst
- Cyber Security Consultant
- Cloud Security Engineer
- Data Scientist
- Electronics Engineer
- Games Designer
- Infrastructure Director
- IT Professional
- Network Engineer

Research specialisms

- Big data
- Infrastructure
- Intelligent cyber security solutions
- Intelligent systems, gaming and learning
- Internet of Things (IoT)
- Medical informatics, engineering and imaging
- Mobile technology
- Sound and game engineering
- Virtualisation

Professional Qualifications (Distance Learning)

- CCNA Routing and Switching
- CCNA Security
- VMware vSphere: Install, Configure, Manage v6

We're home to the annual Brains Eden festival;

the UK's largest student gaming festival

Engineering and Manufacturing

Additive Manufacturing, Civil Engineering, Electronic and Electrical Engineering, Electronics, Engineering and Tribology, Engineering Management, Magnetic Resonance Imaging, Mechanical Engineering, Medical Engineering, Medical Technology, Science and Technology

From the buildings in which we live and work, to the technological devices we use every day almost without thinking, engineering and manufacturing play an important and increasingly visible role in modern life.

Take a closer look...

The Anglia Ruskin MedTech Campus will bring together all of the essential components of the innovation process and provide one of the world's largest health innovation spaces to drive business growth in the UK MedTech sector.

- A number of our courses are accredited by professional bodies including the Institution of Civil Engineers (ICE), the Institution of Engineering and Technology (IET) and the Institution of Mechanical Engineers (IMechE).
- We hold regular networking events to enable you to build links with employers.
- We created the UK's first dedicated taught Masters in 3D printing.

With a range of engineering and manufacturing courses to choose from at Anglia Ruskin, you're sure to find a postgraduate degree that suits your career ambitions. Many of our courses are accredited by professional bodies, so - whether you're interested in being at the forefront of the latest advances in 3D printing or seeking registration as a Chartered Engineer - you can be confident of developing a deeper understanding of the most up-to-date technologies used in industry.

Staff Spotlight

Your course leader

Dr Mehrdad Asadi

Course Leader, MSc
Mechanical Engineering

Mehrdad joined Anglia Ruskin in 2012 with over ten years' experience managing industrial projects, including being a structural analyst for the Force India Formula 1 team. He is a specialist in metal/carbon composite mechanics, applied Finite Element techniques in crashworthiness, pedestrian and passenger safety, nuclear energy dissipation systems and roadside safety equipment.

Research specialisms

- Clean technology
- Electronics and telecommunications engineering
- Engineering analysis, simulation and tribology
- Fluid dynamics
- Heat transfer
- Medical devices
- Orthopaedic medical engineering
- Rapid prototyping (3D Printing)
- Thermodynamics
- Vascular disease

Get hands-on experience with our industrial-scale modern CNC machines, rapid prototyping machine and robotic systems.

Career pathways

Our courses equip you with the knowledge and skills you'll need to advance your career in professions including:

- 3D Print Technologist
- Civil Engineer
- Clinical Imaging
- Engineer
- Engineering Manager
- Environmental monitoring
- Manufacturing Production Manager
- Materials Scientist
- Mechanical Designer
- Mechanical Engineer
- Medical electronics
- Microelectronics

Language, Literature and Media

Applied Linguistics and TESOL, Children's Literature, Creative Writing, English Language and Intercultural Communication, English Language and Linguistics, English Literature, Intercultural Communication, International Relations, Publishing, Science Fiction and Fantasy, TESOL and Materials Development, Writing and Publishing

Research specialisms

- 19th century studies
- ARC media
- CoDE (Cultures of the Digital Economy)
- Intercultural and transcultural studies
- Reinventing the renaissance
- Science fiction and fantasy

From applied linguistics and intercultural communication to children's literature and creative writing, our courses engage a diverse and passionate academic community in the exploration of subjects that expand our understanding of culture and communication in this global age.

Our approach focuses on skills and knowledge valued by employers. You'll benefit from talks by internationally acclaimed guest speakers, and the opportunity to attend research conferences.

We combine traditional scholarship and criticism with professional practice, so you will leave us with everything you need to make your mark.

We offer you the opportunity to study flexibly to fit round your life and work and have options including evening teaching, distance learning and blended delivery, a combination of distance learning and short, intensive on campus teaching.

Our MA Publishing was developed in close consultation with Cambridge University Press and other local publishers, including ProQuest and Lutterworth's.

Career pathways

- Administrator
- Human Resources Professional
- Intercultural Mediator
- Intercultural Trainer
- Journalist
- Language Consultant
- Novelist
- Playwright
- Publisher
- Teacher (English Language)

Common entry requirements

Most of our courses require a good honours degree (or equivalent), normally in a related subject. Applicants with professional experience are also encouraged to apply.

Take a closer look...

at how our MA Creative Writing has made a difference to Natalya's life, or visit: anglia.ac.uk/natalya

Our Publishing graduates have a track record of success: 100% of our students have gone into paid employment within six months of graduating, with more than 90% in publishing-related careers at companies such as Bloomsbury, Wiley Capstone, Pearson, Cambridge University Press and Macmillan.

Law, Crime and Social Studies

Analytical Chemistry, Criminology, Cyber Security, Forensic Science, History, International Law, International Commercial Law, International Relations, Law, Legal Practice, Digital Economy, Medical Law and Ethics, Practical Theology, Sociology

- Our Legal Practice Course is accredited by the Solicitors Regulation Authority (SRA).
- In keeping with its industry focus, our Chartered Society of Forensic Sciences (CSFS) accredited Masters in Forensic Science is taught by experienced forensics practitioners.
- We hold a national record of six wins in the National Client Interviewing Competition, which is sponsored by the Law Society.
- Top up your current qualification to an LLM in just six months.
- Study while you work: our part-time courses are perfect for busy professionals.

We provide the training and professional qualifications to not only form successful prosecutions, but also understand what makes a criminal. Develop your critical thinking to deal with the issues that shape the world today.

Whether you're passionate about Criminology, International Relations or Sociology, you will find inspiration and support within our student community and from our experienced academics, as well as benefiting from our strong industry links and relationships with local community organisations.

Your learning will also be supported by lectures, guest speakers and debates. You'll have a chance to contribute to our research seminar series and you can be sure you're receiving the latest theory and careers advice.

Anglia Law School, trains the lawyers and legal advisers of the future across a broad range of disciplines. Our teaching staff includes both research-active academics and professionally qualified lawyers, so you will enjoy access to the latest theories and case studies, as well as receiving invaluable career guidance.

Career pathways

- Barrister
- Cyber Security Consultant
- Forensic Scientist
- Immigration/border control
- Journalist
- Police Officer

Music and Performing Arts

Arts Management, Body Psychotherapy, Dramatherapy, Music Technology, Music Therapy, Musicology, Theatre and Performance

Join a thriving and interdisciplinary postgraduate community. You'll benefit from a variety of events, including our Faculty and Departmental research seminar series, performance events and international conferences, and connections with the creative industries and health sectors.

Internationally recognised our courses are taught by leaders in their field.

If you're an experienced musician or drama practitioner and want to put your skills to use supporting children and adults with additional needs, our emphasis on clinical placements will prepare you for a rewarding career. When you graduate, you'll be qualified to work as a therapist in the UK and overseas, and eligible for registration with the Health and Care Professions Council in the UK.

Through lectures, practical workshops, case discussions and theoretical studies, we'll introduce you to the most recent, effective therapy approaches. You'll reflect on your own practice in our clinical supervision group discussions, supported by regular individual tutorials.

Research specialisms

- Composition
- Creative music technology
- Digital performance
- Dramatherapy
- Experimental theatre
- Music therapy
- Musicology

Professor Amelia Oldfield, course tutor on our MA Music Therapy, was recently awarded the first ever Clinical Impact Award by the World Federation of Music Therapists (WFMT).

Staff Spotlight

Your course leader

Mandy Carr

Course Leader,
MA Dramatherapy

anglia.ac.uk/drcarr

For the last 30 years, Mandy has been active as a teacher, director and performer in London. She has a special interest in the use of dramatherapy to facilitate intercultural dialogue and has convened British Association of Drama Therapists' (BADth) Equality and Diversity Sub-Committee since 2007.

Mandy works as a dramatherapist with adolescents on the autism spectrum and/or with emotional difficulties in secondary education. She is registered with the Health and Care Professions Council and also runs a small private practice, offering dramatherapy and arts therapy supervision.

Our Music, Drama, Dance and Performing Arts research was awarded world-leading status by the Research Excellence Framework (REF) 2014.

We organise many events both on and off campus, from free weekly lunchtime concerts by professional musicians to opportunities to get involved with local theatre, operas and musicals throughout the year. Theatre performances take place in our on-site, 270-seat performance venue, the Mumford theatre, as well as at the Cambridge Junction, one of the leading arts venues in the region.

Common entry requirements

You will need either a good honours degree in a related subject or relevant professional experience. You will also be required to attend an interview and present a portfolio of work for assessment.

- Child and Adolescent Mental Health Practitioner
- Healthcare Practitioner
- Healthcare Manager
- Health Visitor
- Family Support Worker
- Independent Prescriber

Pursuing a career in health can change your life, and make a real difference to the lives of others. If a future in nursing, care or wellbeing appeals to you, or you're making progress in your chosen field and want to go further, you're in the right place.

Our MSc in Advanced Midwifery Practice focuses on clinical care and is taught by experienced midwives.

Our postgraduate health courses will equip you with the knowledge and skills you will need to get ahead and thrive in a career focused on helping others. We have educated nurses and midwives for over 25 years, and our courses have been designed with your career in mind. You will learn authentically through the use of our advanced facilities, which mirror real-life clinical situations such as UK hospital wards. Many of our courses are accredited from professional bodies including the Nursing and Midwifery Council and the Royal College of Nursing.

Psychology

Applied Positive Psychology, Body Psychotherapy, Clinical Child Psychology, Cognitive and Clinical Neuroscience, Consumer Psychology, Foundations in Clinical Psychology, Psychology, Research Methods in Psychology, Science and Technology

Study in a city renowned for its contribution to the study of psychology, and benefit from the expertise of a dynamic department that delivers world-leading teaching and research.

Rated world-leading and internationally excellent by the Research Excellence Framework (REF) 2014, our Psychology department is a rich source of knowledge, inspiration and first-class teaching. Our highly experienced, research-active staff will help you put theory into practice using the latest facilities, which include state-of-the-art EEG, Human Tissue Analysis, and Developmental and Eye-tracking labs.

Research specialisms

- Autism
- Body and self
- Child development
- Consumer psychology
- Driving behaviour
- Emotion and wellbeing
- Executive function
- Gender and sexualities
- Health psychology
- Identity and social issues
- Language and cognition
- Memory and perception

Common entry requirements

You'll generally require a 2.1 undergraduate degree in Psychology or other closely related discipline. The exception is Consumer Psychology which just requires analytical ability. For some clinical courses, an interview is required for students with a Graduate Basis for Recognition (GBR) 2.2 undergraduate degree in Psychology.

- Our Applied Positive Psychology course is uniquely delivered in both Paris and Cambridge
- Industry professionals provide insight and internship opportunities as part of our MSc Consumer Psychology
- Our MSc Clinical Child Psychology is one of just a handful available in the UK.

Whether you're interested in Applied Positive Psychology, Clinical Child Psychology or Research Methods in Psychology, we'll help you develop the skills and knowledge to further your professional career.

Your Director of Studies

Dr Jane Aspell

Senior Lecturer and Director of Postgraduate Research

anglia.ac.uk/draspell

Jane is a cognitive neuroscientist and her research focuses on the multisensory bodily basis for self-consciousness. She has been a Senior Lecturer at Anglia Ruskin since 2011. Before joining us, Jane undertook postdoctoral research at the École Polytechnique Fédérale de Lausanne (EPFL) in Switzerland, at Goldsmiths College in London and at the University of Oxford. She did her PhD at the University of Newcastle under Professor Anya Hurlbert and for her undergraduate studies, she read Biological Sciences at Somerville College, University of Oxford. In addition to being the module leader for Diagnosis and Treatment in Clinical Child Psychology, and Current Theoretical Issues in Cognitive Neuroscience, Jane also supervises students on PhD projects.

Social Care and Education

Early Childhood Education, Education, Educational Leadership and Management, Family Therapy and Systemic Practice, Global Military Veteran and Family Studies, Health, Health, Social Care and Education, International Social Welfare and Social Policy, Learning and Teaching (Higher Education), Mental Health, Mental Health Practice, Social Work, Special Educational Needs and Disability, Student Affairs in Higher Education

We firmly believe that learning doesn't just happen in the classroom. Using a forward-thinking approach, we encourage you to actively develop transferable skills that are relevant across all sectors of the education and social care community. Having trained social workers, as well as education and social policy professionals, for over two decades, we continue to produce graduates who make a difference to people's lives.

You will be able to follow your academic and professional interests to develop your expertise. Our courses are suitable for different stages of your career and you will build a network of local, national and international colleagues within your discipline.

Our range of postgraduate courses will help you to build on the skills you have accumulated through previous study and work experience, enabling you to make a significant contribution to improving people's quality of life.

We are the first university in the United Kingdom to offer a fully globalised course. Our MSc Global Military Veteran and Family Studies has been developed in collaboration with key institutions in India, Australia and the United States.

Staff Spotlight

Your course leader

Dr Claudia Schnieder
MSc International Social Welfare and Social Policy
anglia.ac.uk/drschnieder

With the focus on social welfare and social policy issues in the local, national and international context, use Zapparo to hear Dr Claudia Schnieder explain how our course will give you the skills and understanding to really make a difference.

Research specialisms

- Early childhood education
- Digital literacy and computing
- Participatory research
- Education curriculum
- Social inclusion
- Migration
- Veterans and families

Taught by nationally and internationally recognised tutors, you'll focus on the latest knowledge and evidence in your field. You'll build on your skills through exciting placement or volunteering opportunities and field days. And our wide range of facilities include an Early Years Resource and Research Room.

Working in partnership with the Health Care Professions Council (HCPC) and over 400 schools, we offer postgraduate courses that have been designed with you in mind. No matter what route you take, you'll leave us a confident and able professional in education or social care-related environments.

During your time with us, you'll achieve an ideal balance between academic theory and practical experience. You'll be taught by nationally and internationally recognised tutors, focusing on the latest knowledge and evidence in your field. Alongside this, you'll build on your skills through our exciting placement opportunities and modern facilities that include an Early Years Resource and Research Room.

Our PG Cert Learning and Teaching (Higher Education) is accredited against the Higher Education Academy Professional Standards Framework.

During our MA Social Work, you will spend most of your time in practice placements, where the emphasis is on hands-on, real-world learning. On graduation, you'll be eligible to register as a social worker with the HCPC.

Our PG Cert Family Therapy and Systemic Practice is accredited by the Association of Family Therapy (AFT). It is carried out at a Child and Adolescent Mental Health Unit and we have strong links with the local mental health trust.

Get first-hand experience of student services in the USA with an optional internship on our MA Student Affairs in Higher Education.

Career pathways

Entry requirements and how to apply

Whether you choose a taught Masters, PhD or Professional Doctorate, there's a simple application process and an experienced team on hand to support and guide you through your application.

Taught Masters courses

For most taught postgraduate courses, you'll need a qualification or experience equivalent to a UK honours degree, usually in a relevant subject area. Course requirements vary, however, so please check the relevant course page online at anglia.ac.uk/pg for detailed requirements.

Applying for a taught Masters course

You can apply online for any of our Masters courses. Just visit the relevant course page on our website and click **Apply Online**.

When assessing your application, we'll consider:

- whether your qualifications meet our entry requirements
- your subject-specific abilities
- your broader personal, professional and educational experience.

Next step

Visit anglia.ac.uk/pg to check the entry requirements for your chosen course and apply directly online.

Doctoral study

If you're seeking admission to the MPhil or MPhil with the possibility of transfer to PhD or DProf, you will normally be required to hold a first or upper second-class honours degree from a university or other institution of higher education recognised by Anglia Ruskin.

Alternatively, a qualification regarded by Anglia Ruskin as equivalent to a first or upper second-class honours degree may be accepted. For entry to a DProf, you'll also need to demonstrate that you have appropriate professional experience. We also accept applications for the PhD direct entry programme. In this case, you'll need to hold an award equivalent to a UK degree, in an appropriate cognate area, which includes training in research and the execution of a research project. You will be required to supply documentation to support your application.

If you don't have these qualifications, your application will be considered on its merits in relation to the nature and scope of your proposed research.

If English is not your first language, you will also need a minimum IELTS score of 6.5 and have achieved a minimum of English Language competence to at least IELTS 5.5 across all four disciplines of writing, reading, speaking and listening.

How to apply for a Doctoral programme

Your first step is simple. Choose an area of research that you would like to undertake and get in contact with us.

Our research specialisms are broad, so if your chosen area does not appear in the MPhil or PhD options listed on our subject pages, it doesn't mean that we can't support you.

Once you have registered your interest, we can support you through your application and guide you on your research proposal and supporting documents.

Once we have made you an offer, you will be able to accept it online.

Online guide

Writing your first research proposal needn't be daunting. You'll find a guide to preparing your research proposal online at anglia.ac.uk/researchproposal

For more information and contact details

visit anglia.ac.uk/pgrapplications

International students

If you're an international student, you can find out if your qualifications meet our entry requirements by visiting anglia.ac.uk/mycountry and selecting your country from the list. If your country is not listed, email us at internationaladmissions@anglia.ac.uk and we will be able to advise you.

If English is not your first language you'll need to be able to show you have the required level of English language. Our standard entry criteria for postgraduate courses is IELTS 6.5 or equivalent, with nothing lower than 5.5 in any of the four elements listening, speaking, reading and writing.

Some of our courses may have higher English language proficiency requirements; for specific details and exceptions regarding IELTS, please visit your chosen course page.

We also offer our own English Language Proficiency Test to give you the opportunity to show proof of your language level if required. Visit anglia.ac.uk/internationaladmissions for further information.

Ready to apply?

You can apply online by visiting the course page at anglia.ac.uk/pg and clicking 'apply online' on the top right of the page.

How much will it cost?

Before you embark on a postgraduate degree, you need to know how much it's likely to cost. You'll find a wealth of financial information and advice on our website, but here are the key facts and figures.

Postgraduate loans

The government offers a postgraduate loan (PGL) of up to £10,000 for new Masters students.

You can decide how much or little you want to receive, up to the maximum amount. The loan is not means-tested and you can amend the amount you have requested up to one month before the end of the academic year. You don't have to declare how you plan to use the funds, which may be used to help pay fees, for accommodation or to cover other costs you may incur while studying.

If you're eligible for a Postgraduate Loan, you can still receive scholarships, bursaries or other funding you have applied for.

Find out more

To check availability and apply for a postgraduate loan, visit www.gov.uk/postgraduatel oan

Our course fees

Taught course fees

A taught postgraduate qualification may mean you have to attend lectures and seminars, as well as taking exams, writing a dissertation (on Masters courses) or being involved with practical work. Fees for these qualifications are set depending on the costs associated with the course and typically range from £5,100 to £12,900 for Masters courses per year. The fees for Postgraduate Certificates and Diplomas vary according to the individual course subject, with the cost reflecting the quantity of additional resources and equipment needed. To find out the cost of your course, visit our course pages at anglia.ac.uk/pg

Part-time course fees

Fees for part-time postgraduate students are linked to the full-time fee rate, and what you pay depends on the number of course credits you study each year. You can find the part-time fee for your chosen course on the course pages.

International tuition fees and scholarships

For more information about international fees, scholarships and other ways of funding your course, head to anglia.ac.uk/international/fees

Postgraduate research fees

Postgraduate research qualifications are awarded to students for their original academic research, which is reviewed by independent examiners. Research programmes can last from around two years for a full-time MPhil to up to six years for a part-time PhD.

UK/EU full-time fees

MPhil/PhD: £4,195

Professional Doctorate: £4,195

Bench fee (if required): from £1,000 to £7,000 (depending on nature of research)

Writing-up fee: £1,350

UK/EU part-time fees

MPhil/PhD: £2,098

Professional Doctorate: £2,098

PhD by Published Work:
Initial registration: £1,100.

Full registration: £3,500

Writing-up fee: £850

For postgraduate research fees applicable to international students, please visit anglia.ac.uk/intresearchfees

Books Plus

We offer eligible postgraduate students from the UK or EU up to £400 each year to help with study-related costs, such as textbooks and equipment including stationery, art supplies and digital equipment, through our Books Plus Scheme. For more information on this, visit: anglia.ac.uk/booksplus

Funding and scholarships

We offer a number of alumni, course-specific and sports scholarships for our postgraduate courses. For a full list and eligibility criteria, go to anglia.ac.uk/pgfunding

Paying your fees

In addition to the government loan of up to £10,000 now applicable to postgraduate courses, you won't need to pay fees until you've accepted an offer to study with us.

Fees can be paid in three instalments through our online payment system, or via a bank-to-bank transfer.

See for yourself

Our Open Days are the best way to decide if Anglia Ruskin is the university for you. Explore the campus, take a closer look at our facilities and, above all, meet the fantastic people who study and work here.

Virtual Visits

Can't visit us in person but want to see what we have to offer? Visit us virtually at anglia.ac.uk/virtualopenday

Lord Ashcroft building,
Chelmsford campus

Explore the campus

Visit our state-of-the-art facilities and discuss fees, funding, course and career options.

Talk to our tutors

You'll get the opportunity to discuss the course or programmes you have in mind with our academics on the day.

Apply in person

If you like what you see, you can make your application on the day, and we may even be able to make you an offer there and then.

If you live overseas...

It may not always be possible to attend an Open Day in person. If you're an international student, you may be able to meet us in your own country before you apply, as our International Team travel to educational fairs all over the world. Terms and Conditions

Anglia Ruskin University holds/processes personal data and sensitive personal data on all applicants and enrolled students in computer and paper-based administrative systems. All such data is held/processed in accordance with the provisions of the Data Protection Act 1998.

For further information on the holding and processing of personal data please view our Privacy Policy at anglia.ac.uk/privacy

Notice to potential students

Anglia Ruskin University Higher Education Corporation is an exempt charity. Registered Office: Bishop Hall Lane, Chelmsford, Essex CM1 1SQ.

This prospectus describes the courses and awards offered by Anglia Ruskin University. Anglia Ruskin University's online prospectus contains further information about each course and any updates. The online prospectus can be viewed here:

anglia.ac.uk/pg

Should you become a student of Anglia Ruskin University, you will receive additional documents detailing the teaching, examination, assessment, and other education services offered by Anglia Ruskin University. In particular, you will be invited to be bound by the Rules, Regulations and Procedures for Students, a copy of which can be obtained from the Secretary & Clerks Office or at anglia.ac.uk/keydocuments

Before you apply to Anglia Ruskin University

Anglia Ruskin University endeavours to take all reasonable steps to provide the education services in the manner set out in this prospectus and in those additional documents. It does not, however, guarantee the provision of such services. Should industrial action or other events beyond the control of Anglia Ruskin University interfere with its ability to provide education services, Anglia Ruskin University undertakes to use all reasonable endeavours to minimise the resulting disruption to those services.

Should you become a student at Anglia Ruskin University, an offer letter will be sent to you and this shall constitute a term of any contract between you and Anglia Ruskin University. Any offer of a place made to you by Anglia Ruskin University is made on the basis that in accepting such an offer you signify your consent and agreement to abide by the Rules Regulations and Procedures for Students as a term of any such contract. All course information in this prospectus is correct at time of going to print. Considerable care has been taken in the preparation of this prospectus to ensure its accuracy at the time of going to press.

If, however, you feel that it is inaccurate or misleading, you should write, stating the detail of your complaint, to: The Secretary and Clerk to the University, Anglia Ruskin University, Bishop Hall Lane, Chelmsford, Essex CM1 1SQ.

Printed on Galerie Art Silk. The paper is independently certified according to the rules of the Forestry Stewardship Council® (FSC®). The manufacturing mill holds the ISO 14001 environmental certification and the EU Eco-label (EMAS).
